

# Texas Commission on Environmental Quality Waste Permits Division Correspondence Cover Sheet

Date: 09/06/2022

Facility Name: 130 Environmental Park

Permit or Registration No.: 2383

Nature of Correspondence:

Initial/New

Response/Revision to TCEQ Tracking No.:  
\_\_\_\_\_ (from subject line of TCEQ letter  
regarding initial submission)

Affix this cover sheet to the front of your submission to the Waste Permits Division. Check appropriate box for type of correspondence. Contact WPD at (512) 239-2335 if you have questions regarding this form.

## LIMITED SCOPE PERMIT AMENDMENT NARRATIVE

---

This limited scope permit amendment application has been prepared in accordance with 30 TAC §305.62(j)(2) for permit amendments where “only the portion of the permit and attachments to which changes are being proposed are required to be submitted”. This proposed limited scope amendment for the 130 Environmental Park is submitted under 30 TAC §305.62(j)(2)(B) for “changes in waste acceptance and operating hours outside the hours identified in 30 TAC §330.135... or authorization to accept waste or operate on a day not previously authorized”.

The current approved permit provides authorization for acceptance of waste between 7:00 a.m. to 7:00 p.m. and to operate equipment between 5:00 a.m. and 9:00 p.m. on Monday through Friday.

This limited scope amendment will ~~update the permit to provide authorization extend the landfill operating hours. Authorized hours for acceptance of waste and for site operations 24 hours per day, 7 days per week will be between 5:00 a.m. and 7:00 p.m., Monday through Friday and between 6:00 a.m. and 5:00 p.m. on Saturday. For a minimum of ten years after approval of this permit amendment, any Caldwell County resident may dispose of up to 6 cubic yards of accepted waste at no charge during Saturday waste acceptance hours. Site operations may be conducted between 5:00 a.m. and 9:00 p.m. Monday through Friday, and between 6:00 a.m. and 6:00 p.m. on Saturday.~~ Site operations include construction, material delivery, maintenance, earthmoving, monitoring, transportation of construction materials, heavy equipment operation, and other non-waste acceptance operations.

The 130 Environmental Park provides waste disposal for individuals, businesses, and communities in Caldwell County and the surrounding counties. The service area for the facility is a wide area with significant haul distances from some of the serviced communities. To better serve those communities, businesses, and customers, expanded operating hours will allow for more efficient waste collection and disposal outside typical working hours and peak traffic times, and reduce traffic and other impacts to infrastructure. ~~The addition of Saturday operating hours will provide available weekend disposal, including for individuals who, for work or other reasons may be unable to get to the landfill on weekdays, and for businesses (restaurants, grocery stores, etc.) needing waste collection and disposal services on Saturday. Authorizing waste acceptance hours to begin at 5 a.m. (6 a.m. on Saturday) will allow vehicles collecting waste in the very early morning hours to get their first loads of the day to the landfill and return to their collection routes before the peak morning traffic times for persons travelling to work, students travelling to schools, and others travelling on area roadways, thereby reducing peak hour traffic on roadways providing access to the landfill.~~

~~The original permit application anticipated extended operating hours and the traffic study that was performed for the original application included an analysis of traffic patterns and estimated site traffic from 2:00 a.m. through 7:00 p.m. during the Monday through Friday typical work week. The existing traffic analysis also anticipated limited operation (approximately 7 hours) on Saturdays. The original traffic study concluded that US 183~~

~~had adequate capacity available to serve the traffic generated by the 130 Environmental Park throughout the life of the site and predicted there would be minimal impact to US 183 traffic flow. The northbound right turn deceleration lane recommended in the original traffic study has been constructed and is in operation. The extended hours will reduce the anticipated traffic affecting US 183 between the study hours of 2:00 a.m. and 7:00 p.m. The volume of waste/vehicles in the original study is not increasing so there will be less impact on the traffic during the typical higher traffic hours from 7:00 a.m. through 7:00 p.m. by authorizing some of the waste vehicles to enter and exit the site in the overnight extended hours.~~

### APPENDIX IVA – LOAD INSPECTION REPORT

### APPENDIX IVB – REGULATED ASBESTOS-CONTAINING MATERIAL PLAN

### APPENDIX IVC – SPECIES PROTECTION PLAN

A maximum of three working faces may be used during any specific time period, but typically one working face will be used except during inclement weather. The three active working faces include two working faces for disposal of municipal solid waste and one for RACM. The size of the working faces will be limited to by the availability and capacity of the site equipment to place cover soil, and the location of soil stockpiles, including those adjacent to the working face.

On days when RACM is accepted, the RACM unloading and disposal area will be a width consistent with the rate of incoming RACM while allowing for safe and efficient operation. The RACM unloading and disposal area will not be larger than 50-feet by 50-feet. The RACM unloading area is further discussed in Appendix IVB – Regulated Asbestos-Containing Material Plan.

The large item storage area for large items and white goods may be provided near the active working face or may be provided near the citizen's convenience center. Control will be used to confine the large item storage area to an area consistent with the rate of incoming large items and white goods while allowing for safe and efficient operation. The large item storage area is further discussed in Section 8.9 and Section 8.25.1.

The citizen's convenience center for waste drop-off will be located within the site entrance facilities. The citizen's convenience area will include roll-off containers for waste and recycled goods and may include an area for large item storage. Control will be used to confine this area to a minimum area consistent with the rate of incoming waste while allowing for safe and efficient operation. The citizen convenience area is further discussed in Section 8.25.3.

Any prohibited waste that is not discovered until after it is unloaded shall be returned to the vehicle that delivered the waste. The generator shall be responsible for the proper transportation and disposal of this rejected waste. In the even the unauthorized waste is not discovered until after the vehicle that delivered it has departed the site, the waste shall be segregated and controlled, as necessary. An effort shall first be made to identify the entity that deposited the prohibited waste and have them return to the site and property transport and dispose of the waste. A record of unauthorized waste removal will be maintained in the site operating record.

Signs with direction arrows and portable traffic barricades will help to restrict traffic to designated disposal locations. Signs will be placed along the access route to the current disposal area or other designated disposal areas that may be established. In addition, rules for waste disposal and prohibited waste will be prominently displayed on signs at the site entrance. Refer to Section 5 of this SOP for additional waste handling procedures.

### **8.3 Hours of Operation**

130 Environmental Park is authorized for waste acceptance between 5:00 a.m. and 7:00 p.m. Monday through Friday and between 6:00 a.m. and 5:00 p.m. on Saturday. For a minimum of ten years after TCEQ approval of Saturday operating hours, any Caldwell County resident may dispose of up to 6 cubic yards of accepted waste at no charge during Saturday waste acceptance hours. ~~and for site operations 24 hours per day, 7 days per week. Site operations may be conducted between 5:00 a.m. and 9:00 p.m. Monday through Friday, and between 6:00 a.m. and 6:00 p.m. on Saturday, and may include construction, material delivery, maintenance, heavy equipment operations, transportation~~

of construction material, and other non-waste operations. 130 Environmental Park will post the hours for waste acceptance from private and public waste haulers on the site entrance sign. 130 Environmental Park may be open other hours, as may be required to provide solid waste disposal services for special events, inclement weather, emergencies and other circumstances. 130 Environmental Park will notify the TCEQ regional office and will record waste acceptance hours outside of posted hours in the site operating record.

~~The 130 Environmental Park provides waste disposal for individuals, businesses, and communities in Caldwell County and the surrounding counties. The service area for the facility is a wide area with significant haul distances from some of the serviced communities. To better serve those communities, businesses, and customers, expanded operating hours will allow for more efficient waste collection and disposal outside typical working hours and peak traffic times, and reduce traffic and other impacts to infrastructure.~~

#### **8.4 Site Signs**

A sign will be displayed at the gated entrance to the site. This sign will measure at least four feet by four feet and have lettering of at least three inches in height. The sign will state the name of the site, type of site, hours and days of waste acceptance, hours and days of site operating, and the TCEQW permit number. An emergency 24-hour contact phone number and the local emergency fire department phone number will also be included. The emergency contact phone number will reach an individual with the authority to obligate the facility at all times the facility is closed. The site sign will be readable from the facility entrance.

#### **8.5 Control of Windblown Solid Waste and Litter**

The working face will be maintained and operated in a manner to control windblown solid waste. Windblown material and litter will be collected and properly managed to control unhealthy, unsafe, or unsightly conditions by the following methods:

- Waste transportation vehicles using this facility will be required to use adequate covers or other means of containment. The adequacy of covers or containment of incoming wastes will be checked at the gatehouse. A sign will be prominently displayed at the gatehouse stating that all loads shall be properly covered.
- The active working face will be limited to as small an area as practical for the safe operation of the incoming waste hauling vehicles, operation of compaction equipment, and delivery and placement of daily cover soils, and alternative daily cover.
- Daily cover or alternative daily cover will be applied to assist with the control of windblown waste.
- The facility will provide litter control fences, as necessary, at appropriate locations near the working face and elsewhere. The litter control fences will be construction of wire or plastic mesh screens attached to portable or permanent frames or temporary fences. The litter control fence will be of sufficient height and will be located as close as practical to the active area to control windblown waste and litter.

## LIMITED SCOPE PERMIT AMENDMENT NARRATIVE

---

This limited scope permit amendment application has been prepared in accordance with 30 TAC §305.62(j)(2) for permit amendments where “only the portion of the permit and attachments to which changes are being proposed are required to be submitted”. This proposed limited scope amendment for the 130 Environmental Park is submitted under 30 TAC §305.62(j)(2)(B) for “changes in waste acceptance and operating hours outside the hours identified in 30 TAC §330.135... or authorization to accept waste or operate on a day not previously authorized”.

The current approved permit provides authorization for acceptance of waste between 7:00 a.m. to 7:00 p.m. and to operate equipment between 5:00 a.m. and 9:00 p.m. on Monday through Friday.

This limited scope amendment will extend the landfill operating hours. Authorized hours for acceptance of waste will be between 5:00 a.m. and 7:00 p.m., Monday through Friday and between 6:00 a.m. and 5:00 p.m. on Saturday. For a minimum of ten years after approval of this permit amendment, any Caldwell County resident may dispose of up to 6 cubic yards of accepted waste at no charge during Saturday waste acceptance hours. Site operations may be conducted between 5:00 a.m. and 9:00 p.m. Monday through Friday, and between 6:00 a.m. and 6:00 p.m. on Saturday. Site operations include construction, material delivery, maintenance, earthmoving, monitoring, transportation of construction materials, heavy equipment operation, and other non-waste acceptance operations.

The 130 Environmental Park provides waste disposal for individuals, businesses, and communities in Caldwell County and the surrounding counties. The service area for the facility is a wide area with significant haul distances from some of the serviced communities. To better serve those communities, businesses, and customers, expanded operating hours will allow for more efficient waste collection and disposal outside typical working hours and peak traffic times, and reduce traffic and other impacts to infrastructure. The addition of Saturday operating hours will provide available weekend disposal, including for individuals who, for work or other reasons may be unable to get to the landfill on weekdays, and for businesses (restaurants, grocery stores, etc.) needing waste collection and disposal services on Saturday. Authorizing waste acceptance hours to begin at 5 a.m. (6 a.m. on Saturday) will allow vehicles collecting waste in the very early morning hours to get their first loads of the day to the landfill and return to their collection routes before the peak morning traffic times for persons travelling to work, students travelling to schools, and others travelling on area roadways, thereby reducing peak hour traffic on roadways providing access to the landfill.

### APPENDIX IVA – LOAD INSPECTION REPORT

### APPENDIX IVB – REGULATED ASBESTOS-CONTAINING MATERIAL PLAN

### APPENDIX IVC – SPECIES PROTECTION PLAN

A maximum of three working faces may be used during any specific time period, but typically one working face will be used except during inclement weather. The three active working faces include two working faces for disposal of municipal solid waste and one for RACM. The size of the working faces will be limited to by the availability and capacity of the site equipment to place cover soil, and the location of soil stockpiles, including those adjacent to the working face.

On days when RACM is accepted, the RACM unloading and disposal area will be a width consistent with the rate of incoming RACM while allowing for safe and efficient operation. The RACM unloading and disposal area will not be larger than 50-feet by 50-feet. The RACM unloading area is further discussed in Appendix IVB – Regulated Asbestos-Containing Material Plan.

The large item storage area for large items and white goods may be provided near the active working face or may be provided near the citizen's convenience center. Control will be used to confine the large item storage area to an area consistent with the rate of incoming large items and white goods while allowing for safe and efficient operation. The large item storage area is further discussed in Section 8.9 and Section 8.25.1.

The citizen's convenience center for waste drop-off will be located within the site entrance facilities. The citizen's convenience area will include roll-off containers for waste and recycled goods and may include an area for large item storage. Control will be used to confine this area to a minimum area consistent with the rate of incoming waste while allowing for safe and efficient operation. The citizen convenience area is further discussed in Section 8.25.3.

Any prohibited waste that is not discovered until after it is unloaded shall be returned to the vehicle that delivered the waste. The generator shall be responsible for the proper transportation and disposal of this rejected waste. In the even the unauthorized waste is not discovered until after the vehicle that delivered it has departed the site, the waste shall be segregated and controlled, as necessary. An effort shall first be made to identify the entity that deposited the prohibited waste and have them return to the site and property transport and dispose of the waste. A record of unauthorized waste removal will be maintained in the site operating record.

Signs with direction arrows and portable traffic barricades will help to restrict traffic to designated disposal locations. Signs will be placed along the access route to the current disposal area or other designated disposal areas that may be established. In addition, rules for waste disposal and prohibited waste will be prominently displayed on signs at the site entrance. Refer to Section 5 of this SOP for additional waste handling procedures.

### **8.3 Hours of Operation**

130 Environmental Park is authorized for waste acceptance between 5:00 a.m. and 7:00 p.m. Monday through Friday and between 6:00 a.m. and 5:00 p.m. on Saturday. For a minimum of ten years after TCEQ approval of Saturday operating hours, any Caldwell County resident may dispose of up to 6 cubic yards of accepted waste at no charge during Saturday waste acceptance hours. . Site operations may be conducted between 5:00 a.m. and 9:00 p.m. Monday through Friday, and between 6:00 a.m. and 6:00 p.m. on Saturday, and may include construction, material delivery, maintenance, heavy equipment operations, transportation of construction material, and other non-waste operations. 130

Environmental Park will post the hours for waste acceptance from private and public waste haulers on the site entrance sign. 130 Environmental Park may be open other hours, as may be required to provide solid waste disposal services for special events, inclement weather, emergencies and other circumstances. 130 Environmental Park will notify the TCEQ regional office and will record waste acceptance hours outside of posted hours in the site operating record.

#### **8.4 Site Signs**

A sign will be displayed at the gated entrance to the site. This sign will measure at least four feet by four feet and have lettering of at least three inches in height. The sign will state the name of the site, type of site, hours and days of waste acceptance, hours and days of site operating, and the TCEQW permit number. An emergency 24-hour contact phone number and the local emergency fire department phone number will also be included. The emergency contact phone number will reach an individual with the authority to obligate the facility at all times the facility is closed. The site sign will be readable from the facility entrance.

#### **8.5 Control of Windblown Solid Waste and Litter**

The working face will be maintained and operated in a manner to control windblown solid waste. Windblown material and litter will be collected and properly managed to control unhealthy, unsafe, or unsightly conditions by the following methods:

- Waste transportation vehicles using this facility will be required to use adequate covers or other means of containment. The adequacy of covers or containment of incoming wastes will be checked at the gatehouse. A sign will be prominently displayed at the gatehouse stating that all loads shall be properly covered.
- The active working face will be limited to as small an area as practical for the safe operation of the incoming waste hauling vehicles, operation of compaction equipment, and delivery and placement of daily cover soils, and alternative daily cover.
- Daily cover or alternative daily cover will be applied to assist with the control of windblown waste.
- The facility will provide litter control fences, as necessary, at appropriate locations near the working face and elsewhere. The litter control fences will be construction of wire or plastic mesh screens attached to portable or permanent frames or temporary fences. The litter control fence will be of sufficient height and will be located as close as practical to the active area to control windblown waste and litter.
